

Experience the Luxury of Seabourn

Building on its foundation as a luxury small-ship pioneer, Seabourn has aligned itself with equally iconic travel and hospitality partners. A partnership with the UNESCO World Heritage Centre provides the line's guests with insider insights from experts with special knowledge about World Heritage, as well as exclusive excursions to many of these landmarks of world history and culture in Europe, designed in collaboration with the organization. In addition, the prices of these excursions include a small donation to support the efforts of UNESCO in protecting this universal heritage.

In its continuing quest to provide the world's finest travel experiences, Seabourn has enlisted the culinary genius of Michelin-starred American chef Thomas Keller in a partnership to further elevate the line's award-winning dining experience to new heights. Chef Keller, the only American-born chef to be awarded multiple three-star ratings from the prestigious Michelin Guide, has created a selection of appetizers, entrees and desserts to be added to the ships' menus. Additionally, each ship will soon welcome guests to a new alternative restaurant dedicated to his signature cuisine. Chef Keller's innovations add to Seabourn's foodie-friendly onboard activities that include frequent flavors of local and regional foods and wines on its menus, and excursions in which guests are invited to go Shopping with the Chef in local markets.

Seabourn's 2016 Europe season offers an array of voyages for every taste. Cruises of seven to more than 21 days explore Europe from the Golden Horn of Istanbul to Norway's North Cape on the Arctic Ocean.
